

MEET THE TRAINER

Certified trainer and behaviorist **Laura Garber**, CPDT-KA, CC, FFCP, believes strongly in strengthening the bond between human and companion animal.

As a fear-free certified professional trainer, Laura has designed a training program to help alleviate the stress and anxiety that so often accompanies a pet's trip to the veterinary clinic. By training your pet to do just a few foundation behaviors, you can *literally* teach your pet to experience calm responses to the clinic situation rather than anxious ones.

Contact **Laura** of **WoofGang** to arrange for a private fear-free training session today!

FOUNDATION TRAINING

It's never too soon to build the skills that will help your pet accept a visit to the vet's office with ease. Even routine annual exams can be scary and, as pets age, their need for medical care is likely to become more frequent, so now is the best time to plan for a future of check-ups and vet procedures.

For the Dog Patient:

- ✓ A default "down" behavior for relaxing calmly in the waiting and exam rooms
- ✓ A "place" behavior for movement onto the scale and the exam mat
- ✓ A "rest"/"steady" behavior for waiting quietly during veterinary handling
- ✓ Desensitization and counter-conditioning to equipment, medicating and handling

For the Cat Patient:

- ✓ To calmly accept being in a carrier and move freely into and out of it
- ✓ A "place" behavior for movement onto the scale and the exam table
- ✓ To allow picking up, handling and restraint of different body parts
- ✓ Desensitization and counter-conditioning to equipment, medicating and handling
